PROFILE

Product designer with 5+ years of experience simplifying complex payments and enterprise workflows. Leads design from problem definition through delivery, with ownership of merchant onboarding and API console experiences. Connects user needs, technical constraints, and business goals through clear interaction design and close cross-functional collaboration.

EXPERIENCE

Global Payments

Senior Product Designer
October 2026 - Present

UX Designer II
May 2021 - September 2026

- **Merchant onboarding:** Led the design modernization of a proprietary merchant API onboarding experience, translating complex configuration requirements into guided workflows.
- **API console ownership:** Owned end-to-end product design for the console, shaping onboarding, API activity and troubleshooting, credentials, and administrative experiences.
- **Developer experience:** Collaborated with engineers, content writers, and stakeholders on the developer portal and public API Explorer; contributed to a portal nominated for DevPortal Awards.
- **International workflows:** Supported internal Salesforce onboarding across UK, Canada, and Asia-Pacific regions, accounting for regional needs within a shared product experience.
- **Design quality at scale:** Initiated and led a UX Reference Library with design leaders to support consistent product decisions across internal applications; contributed to the design system.
- **Cross-functional delivery:** Partnered with developers through regular check-ins to clarify design intent, identify implementation blockers, and maintain alignment throughout delivery.
